# Quick Start Guide to Single Player Testing for EcoQuorum

Single Player Testing Instructions
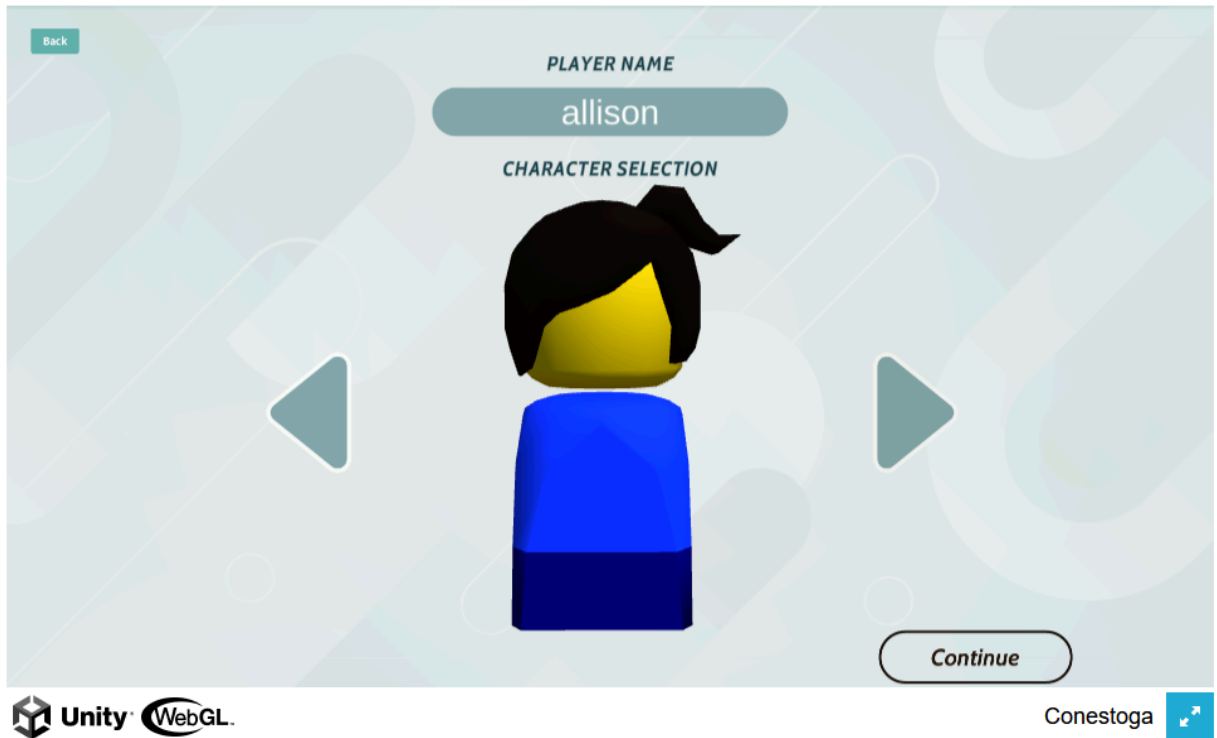

STEP 1:

Click the "Begin Game" button. On the next screen, enter your player name and press the "Connect" button.

STEP 2:

Select your character using the arrows, and then press the "Continue" button.
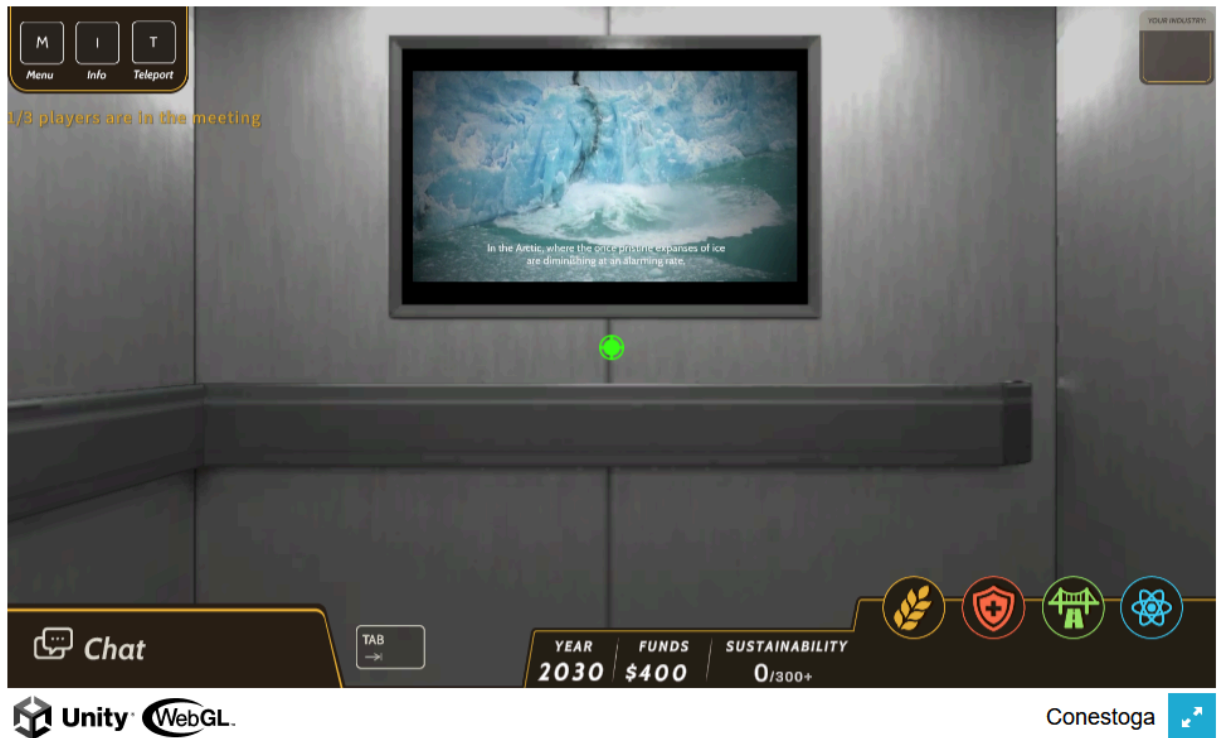

STEP 3:

Press the "Create New Meeting" button.

STEP 4:

Select 3 or 4 Max Players and press the "Create Meeting" button.

STEP 5:

Once in the main game, ensure you are in **fullscreen mode**. Press the **tilde (~)** key on your keyboard.

STEP 6:

The debug dialogue will pop up, as shown below. **Use your mouse cursor** to select the number of players you wish to have. If you are playing single player, select the 1 button with your cursor.

If you have selected a new number of players, the dialog box options will grey out as shown below. Please note, once you have made your selection, you cannot change it. You can now close the dialog box by pressing the tilde key (~) again on your keyboard.

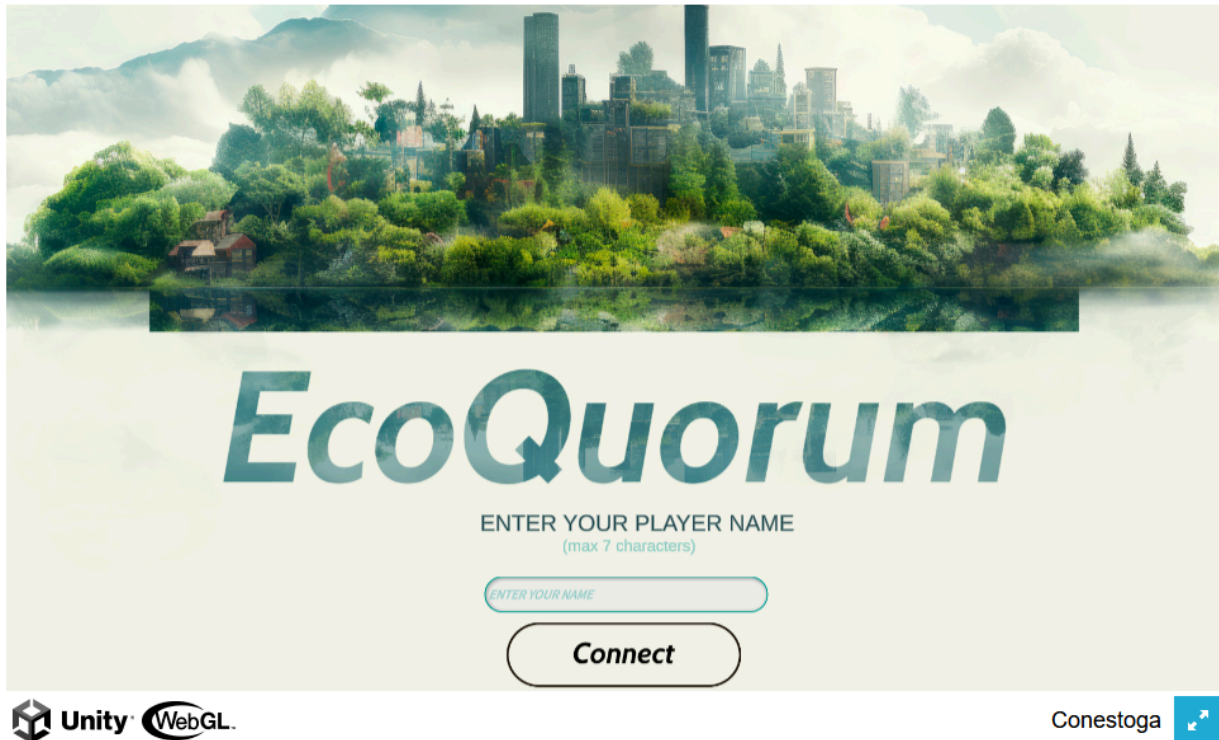

The game will now proceed as normal, but in single player mode. **You must repeat this process for every round of gameplay (2030, 2040 and 2050).** When you are finished testing, we recommend deleting your account data if you would like to playtest again. Please see the instructions below for information on how to delete your account data.

Debug Delete Account Instructions

If you have already engaged in testing previously, your account information is stored in the browser. **You will be unable to do a fresh playthrough for testing until your account information is deleted**, so you will need to follow these steps to reset your account information.
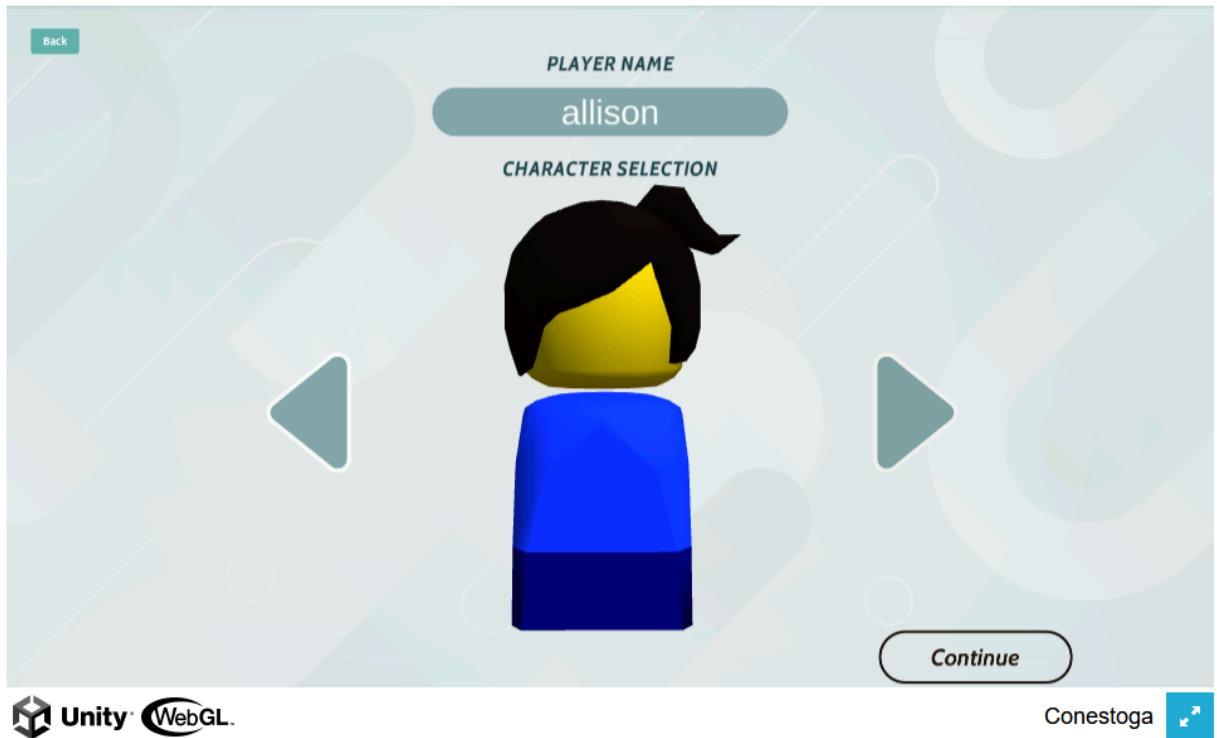

STEP 1:

Click the "Begin Game" button. On the next screen, enter your player name and press the "Connect" button.
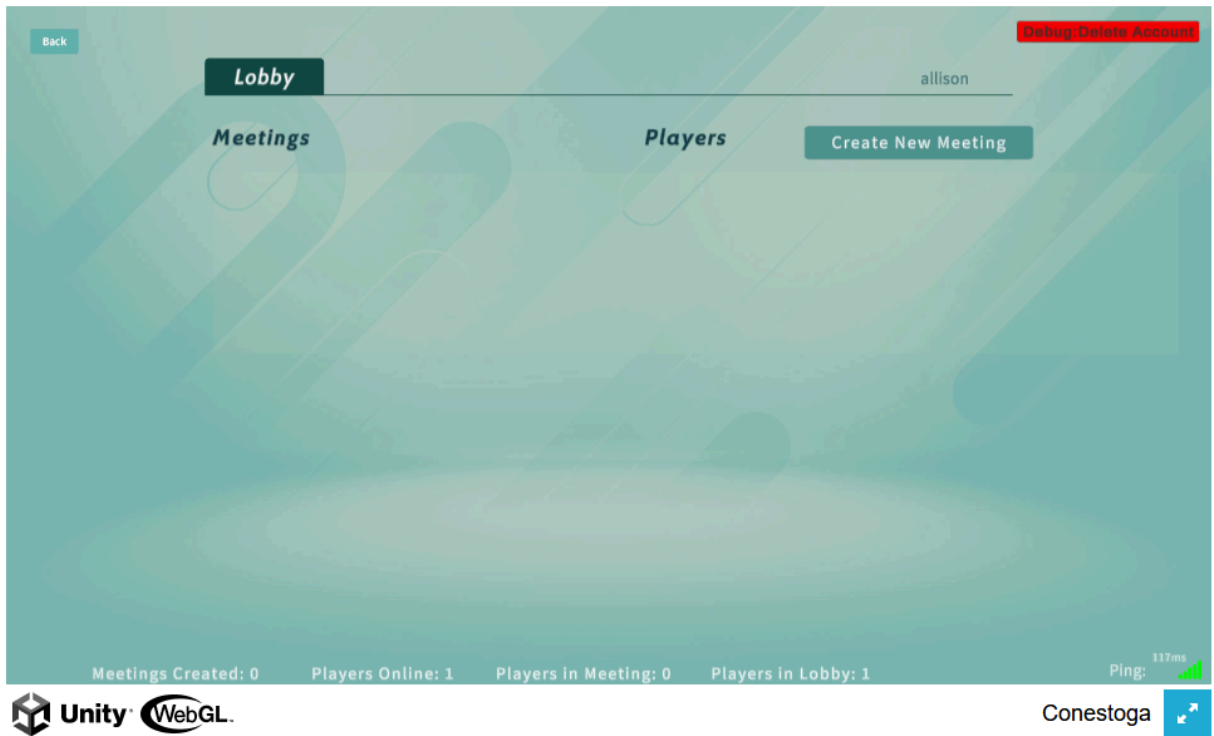

STEP 2:

Select your character using the arrows, and then press the "Continue" button.

STEP 3:

Once you are on the lobby screen, press the "Debug: Delete Account" button. It is the red button in the top right corner of the lobby screen.

STEP 4:

Once you have pressed the button, refresh your browser window. **Wait 10 seconds and then refresh your browser window again.** Your account information is now deleted, and you can proceed normally.
